DETAILED ACTION

Claim Objections

1. Claims 43, 54 and 70 are objected to because of the following informalities:
2. Claim 43 appears incomplete (see claim 43, line 3 (“;”)).
3. Claim 54, line 1, recites: “... according to claim 253 ...” Examiner notes the claim contains a typo and should be rewritten as follows: “... according to claim 53 ...”
4. Claim 70, which represents an apparatus claim, is dependent on claim 45, a method claim. Examiner suggests the dependency of claim 70 be re-written to depend on independent apparatus claim 63.
5. The claims have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the claims.
6. Appropriate correction is required.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 43-71 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. **Patent No. 6,862,339**. U.S. Patent No. 6,862,339 claims a method of producing short-wavelength electromagnetic emissions comprising the steps of providing a target comprising a metallic compound solution in a target zone and irradiating the target with a high-energy source to form a plasma that generates electromagnetic emissions (see claims 1-20 and contrast with instant application 10/795,884 claims 43-62). U.S. Patent No. 6,862,339 also claims a system for producing short-wavelength electromagnetic emissions comprising a vacuum chamber; a target dispenser; a focusing device and a precision adjustment unit (see claims 21-29 and contrast with instant application 10/795,884 claims 63-71). Examiner concludes that the claims of U.S. Patent No. 6,862,339 anticipate the broad claim language of instant application 10/795,884.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. **Patents: 6,831,963; 6,862,339 and 6,865,255 to Richardson** disclose systems and methods for EUV, XUV and X-ray generation utilizing targets consisting of metallic compound solutions. Examiner notes the aforementioned references are not available as prior art under 35 USC 102 or 103, since it is applicant's own work.
